

SHAPE THE FUTURE OF HEALTHCARE WITH US

as a Doctor

SHAPE THE FUTURE OF CARE

Woodlands Health provides care to residents in northwestern Singapore, through our new Campus featuring a fully integrated acute and community hospital, specialist outpatient clinics, intermediate and long-term care facilities, and green healing spaces.

At Woodlands Health, we offer a range of acute, sub-acute, rehabilitative and transitional care services, working closely with our partners to provide seamless care within and beyond our Campus.

Our Campus is set to open progressively from the end of 2023, and in the lead-up, we are expanding our team, inviting those who are passionate to shape the future of healthcare to join us in this journey.

MESSAGE FROM CMB

“

Woodlands Health provides excellent opportunities to be part of the healthcare journey in a landscape that continues to evolve rapidly. Advances in technology brings about new ways to connect with and care for our patients and the wider community. And the increasing recognition of need to extend healthcare beyond the hospital into the community has led to changes in the way care is delivered in the future, from pre-hospital and hospital care, to community and integrated care. We have a team eager to lead the way, to innovate and take advantage of innovations, including engaging with our partners in the community to develop and implement solutions for our patients. I welcome you to make this journey with us. ”

Dr Nicholas Chew

Chairman, Medical Board

WELCOME TO THE COMMUNITY OF CARE

At Woodlands Health, we're building more than a team. We're bringing together a community of people to co-create a care environment for the future, with people who are competent, compassionate and deeply interested in providing the optimum health and well-being of those under our care.

As we prepare to move into our Campus, there will be diverse opportunities to shape our ethos, systems and processes by engaging your peers in the hospital and our partners in the community.

We will also support your professional development, through education and training, and encouraging the sharing of best practices among the care sector in Singapore and the world.

As a member of the Woodlands Health community, you will be a critical part of realising our care model where we will enhance people's health and well-being through a spectrum of healthcare needs and build bridges across multiple areas, including wellness promotion, chronic disease management, elective surgery, acute care, rehabilitation, dementia management, advance care planning, palliative medicine and end-of-life care.

At Woodlands Health, you can contribute to various areas, including

- Patient care
- Clinical education
- Integration of smart technology
- Development of service lines
- Campus infrastructure planning

YOUR BENEFITS

Medical coverage for outpatient care, specialist consultation and hospitalisation

Group personal accident and group term life insurance

Health screening and immunisation

Dental

Annual / medical / hospitalisation / family care / compassionate / marriage / maternity / paternity leave

“

My colleagues at Woodlands Health come from different healthcare clusters in Singapore, but we are all of the same mind in our determination to create a better hospital. The diversity of our backgrounds and the strong support for new ideas from leadership make Woodlands Health a great environment for us to pool our creativity to create better healthcare. Already, we have seen many initiatives and pilot projects in the pipeline or up and running.

Woodlands Health also has a strong kampung (community) spirit. During the COVID-19 pandemic, our leadership was proactive in providing social and emotional support, engaging with us, and updating us frequently. We stood by each other and survived the pandemic. This kampung spirit has been keeping us strong and will do so in the future too!

Dr Er Chaozer

Consultant,
Medical Department

A REWARDING FUTURE

MEDICAL CAREER PATHS

RESIDENT PHYSICIAN

(Resident Physician / Senior Resident Physician / Principal Resident Physician)

In this role, you will provide comprehensive patient care in your chosen discipline of practice under the supervision of Specialist doctors, which would give you strong base of clinical experience. You will also guide our junior doctors (Medical Officers and House Officers). You will work in a team-based ecosystem designed to enable holistic patient care, working alongside nursing, allied health and pharmacist colleagues. In addition to your core clinical duties, you will also be provided with the mentorship and support to develop interests in education, research and health administration.

Requirements

- Possess an MBBS or equivalent with at least 3 years' experience as Medical Officer
- Registered (or meet registration criteria) with the Singapore Medical Council
- Be in active clinical practice in the past 3 years in the relevant discipline
- Those with a registrable postgraduate qualification will have an advantage
- Ability to work in a fast-paced environment, and highly adaptable to changes
- Strong command of written and spoken English.

CONSULTANT

(Associate Consultant / Consultant / Senior Consultant)

In this role, you will deliver specialist care to patients. You will lead the team in your specialty area and work closely with your peers and colleagues to provide comprehensive and holistic care to patients. In addition to patient care management, you will also provide guidance, teaching and training to undergraduate and postgraduate students as well as other healthcare providers. You may also be involved in intra- and interdepartmental projects and committees that drive positive patient experience at the Campus.

Requirements

- Relevant postgraduate qualification in your area of specialty
- Registered (or meet the registration criteria) as a Specialist with the Singapore Medical Council and the Specialist Accreditation Board
- Ability to lead in a fast-paced environment and highly adaptable to changes
- Strong command of written and spoken English.
