

# WH@Home

## Bringing care to your home

Recovery doesn't have to be in the hospital. With our WH@Home care team, you can continue your daily activities with ease while we monitor your condition. We provide home visits or teleconsultations where needed to attend to your medical needs\*.

*\*These include visits by our doctors, nurses, or therapists where appropriate.*

### Why choose WH@Home?

Hospital-standard care in the comfort of your home

Your loved ones can visit you anytime

Minimal disruption to your daily activities

Patient and caregiver training customised to your home setting

Claimable via MediSave/MediFund and most private insurers

## What you can expect

Programme briefing by the WH@Home care team

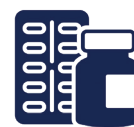

Head home with loaned devices, medications, and medical supplies<sup>^</sup>

Daily submission of vital signs and check-ins via teleconsultations or home visits

Once discharged, receive discharge documents and return the loaned devices

Collect discharge medications at WH Pharmacy or opt for home delivery

<sup>^</sup>Medical supplies will be couriered to your home upon enrolment.

## FAQ

### What if my condition worsens?

You may call the WH@Home hotline (available 24/7). Our care team will assess your condition and take the necessary steps to provide you the appropriate care.

### How will caregivers be involved in looking after patients at home?

Caregivers may take up more active roles in caring for patients such as measuring vital signs and activities of daily living. Our care team will work with caregivers to provide targeted caregiver training and education according to the patient's needs. This empowers both patient and their caregivers to manage their own care and health.

### Is WH@Home more expensive than an inpatient hospital stay?

Charges for WH@Home are similar to or lower than a normal hospital ward. It is also claimable via MediSave/MediFund and most private insurers.

Scan to learn more about WH@Home or speak to your doctor today to find out how to enrol.
